GaiaHumaine company provides Green IT solutions

It optimizes the power consumption of your
computers with our software

Save 40\$ per computer on your electric bill while reducing your CO2 emissions !!!

ServOnOff reduces the cost of electrical energy of
«insomniac computers»,
Managing their stops during night and weekend !!!

. We call: "Insomniac computer"
a computer running 24 hours a day, 7
days a week.
Knowing that his hours of actual use
are more than 10 hours a day, 5 days
a week.

. 5 insomniac computers emit as
much CO2 as a standard car:
approximately 1.8 tonnes of
CO2 per year.

. 5 insomniac computers
require 600 trees to absorb
CO2 emissions.

ServOnOff is also a desktop
Management tool focused on
Silent Software distribution.
Currently, he manages 130
software.

The best energy is the one that is
not consumed ...
